Y = Days particularly good for the tasks stated. **X = Days to avoid tasks stated.** **Other days are neutral days.**

1st, 4th, 5th, 14th, 16th, 26th, & 28th of May are days not recommended for any important, decisions, matters or tasks.

Everyone should be cautious on these days.

Now take it one step further with the chart below, if you were a Dog and you wanted to start a new business you would now be able to calculate that 3-12-18 or 23rd of May were good days and you want to sign contracts or open the doors between 7 – 9 pm as these are good times for a Dog, not a good time to open the doors to a new business but you could do something official like sign contracts or start designing your logo at this time and celebrate with a bottle of bubbly.
